

AGILE WAY OF WORKING

Gert Meiling, PVH Corp. on the agile way of working by Magnus Digital:

“ With the aim to improve our predictability and transparency we worked with Magnus to prepare our department for that future and take a closer look at set up of our teams and way of working. ”

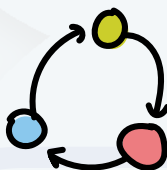

AGILE ASSESSMENT

“ An important prerequisite was to go through this transformation with the organisation, rather than for the organisation. Hand in hand with our partner, we consulted with the teams and collected the symptoms to find the root causes. ”

IMPROVEMENT CYCLE

“ Together with the teams we determined a way forward and jointly implemented this. Now we are working in an environment with clear delivery teams, clearly established stakeholder management, and a structured way of working in a synchronized cadence. ”

IMPLEMENTATION

“ These interventions are rather fresh, however first signals strongly indicate that we managed to create a win-win situation with happier delivery teams and more content stakeholders. ”
